

## Motorhome luxury on eight meters

Von Michael Kirchberger

Morelo is renewing its entry-level models in the luxury motorhome segment. The Loft series is undergoing extensive modernization measures and a new exterior and interior design. In future, kitchen appliances such as refrigerators and ovens will be supplied exclusively by Bosch or Siemens, and a microwave is also on board. New textile wall coverings improve acoustic comfort in the living area. The Loft motorhomes are between 7.99 and 8.45 meters long, the basic 78F model costs 219,900 euros. The basic vehicle is the Iveco Daily, which has an entry-level engine with 175 hp (129 kW). (aum)
