## **The Epiq is to be priced in line with the Kamiq**

With the small Epiq, Skoda will launch an entry-level electric model on the market in the course of the year. The city SUV will have a standard range of up to 430 kilometers and can be charged with up to 133 kilowatts. The trunk is quite generous with a volume of 475 liters. The driver assistance systems include Travel Assist 3.0. In terms of price, the Epiq will be priced in line with a Kamiq with a combustion engine "in many markets" (in Skoda's own words). (aum)
